These computer rendered simulations show digital colour and may vary from the actual dry paint colour. The actual colour will vary depending on the gloss level, application method, film variance, substrate and light source. For accurate colour matches, a sample of paint should be applied, allowed to dry, and checked before proceeding with the entire project.

Digital Colour only gives you a visual idea. We recommend that you purchase a 1L sample in the product with which you intend to paint your walls e.g. *Plascon Cashmere* or *Plascon Wall & All* as your testing option. Please paint two coats on a white surface allowing each coat to dry in thoroughly. It is important to look at the colours in the morning, mid-day and late afternoon to ensure that you are happy with how it changes under different light conditions. Kindly purchase a tester pot from your local hardware and try the colour on a white substrate of at least 1m² before buying large quantities.

DIGITAL SWATCHES

INTERIOR WALL PRODUCT OPTIONS

1. CASHMERE

Plascon Cashmere utilises a unique Triple-Action Bead™ technology that diffuses light to hide imperfections and maintain an absolute matt finish, even with regular wiping. The product is formulated with the technologically advanced Silver Protect™ which inhibits the growth of bacteria, as well as mould and fungus, reducing the chances of discolouration and other damage caused by their growth. It is also a low odour, premium quality, plush wall coating that is highly washable and stain resistant.

Appearance: Matt finish
Application: Interior and exterior
Spread Rate: 9m²/ℓ
Packaging: 1 ℓ, 5 ℓ and 20 ℓ (white and tint bases only) /250ml Tester Pots (tint bases only)
Colours: White, and the standard colours indicated on the colour card

2. DOUBLE VELVET

Plascon Double Velvet is a low odour, premium quality, interior velvet sheen wall coating that is highly washable and stain resistant. The product is formulated with the technologically advanced Silver Protect™ which inhibits the growth of bacteria, as well as mould and fungus, reducing the chances of discolouration and other damage caused by their growth.

Appearance: Velvet Sheen Finish
Application: Interior
Spread Rate: 9m²/ℓ
Packaging: 1ℓ, 5ℓ, 10ℓ and 20ℓ (white and tint bases only)
Colours: White, and the standard colours indicated on the colour card. Now also available in a wide range of Plascon Inspired & Essential Collection Colours.
